Performance Commentary

SKAGEN Kon-Tiki delivered a strong absolute and relative return in April. Hyundai Motor gained after activist investor Elliott entered the company and demanded better capital allocation and governance. Mahindra continues to benefit from recovering rural demand with solid sales. Golar LNG gained from a letter of intent with BP for a floating natural gas unit. Indosat announced weak 1Q18 results due to a clean-up but also fiercer competition. Further sanctions on Russia led to a depreciation of the rouble, which hurt the return of our Russian holdings. Margin weakness for X5 Retail Group also contributed negatively. For Aeroflot, a higher oil price and weaker RUB will weigh on results.

We sold Eczacibasi Yatirim as the share price reflects fair value given its structure. We exited Gree Electric Appliances and Bolloré due to ESG issues. Despite strong results, Gree's decision to suspend dividend marks a worsening of governance, negatively impacting valuation. For Bolloré, we are concerned about the ongoing corruption investigation into the Chairman and key owner.

With 42 holdings, the fund remains focused on its best ideas and the top 35 represent 90% of fund assets. The value characteristic is apparent and we see a weighted upside of 36% over two years.
