Performance Commentary

After months of increasing interest rates in Uruguay, the market finally turned. Interest rates on our bonds fell sharply and led to an appreciation of 2.3 and 2.6 percent on our bonds maturing in 2022 and 2028, respectively. Inflation easing before the market expected it is one of the explanations behind the positive development. Furthermore, the supply of USD bonds instead of UYU bonds has also played a part. In addition to lower interest rates, a stronger UYU versus EUR also contributed to the performance. The interest rates in the Dominican Republic also turned in April and fell by 70 basis points. This development was in line with our expectations as the sharp increase in yields in the first quarter was mostly due to technical factors and we expected the yields to fall from Q2. An appreciation of the Dominican peso relative to the euro also contributed. Greece also contributed positively in April. The yields fell as the market became more optimistic about the outlook for an agreement on debt relief. In April the fund added a position in the Czech Republic. We expect the currency to appreciate versus the EUR as the central bank will tighten its monetary policy ahead of the ECB. We reduced the position in short-dated treasuries.

SKAGEN Tellus invests primarily in bonds and certificates issued or guaranteed by governments from around the world.

The fund is suitable for those with at least a three year investment horizon. Investors must be able to tolerate currency fluctuations.
