

Performance Commentary

Global and Nordic equity markets enjoyed another strong month. As global indexes headed towards new highs, the fear of a global slowdown seemed forgotten. Despite weaker macro data for most of the second half of 2019, we have witnessed new highs in the value of growth companies and the dismissal of historical valuation metrics. Clearly the market believes that this time it is different. In SKAGEN Vekst we were rewarded for our ownership in Vestas, the Danish windmill producer, as the company reported record orders and a solid backlog of new contracts. The Danish freight and logistics company, DSV Panalpina, also attained an all-time high price as the incorporation of acquisitions went better than expected. The fund's overall performance was somewhat hampered by the Danish outsourcer and service company ISS as their outlook was more negative than anticipated and margins from poor contracts weigh down profitability. SKAGEN Vekst entered into Sparebanken Vest in November, as the much anticipated sell-down took place during the month. With historically strong profitability, moderate valuation and well-managed risks, we sought the opportunity to become an owner in what aspires to become 'Norway's best savings bank'.

The fund selects low-priced, high-quality companies in the Nordic region and from around the world.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

Important information

Unless otherwise stated, performance data relates to class A units and is net of fees. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. You can find more information including subscription/redemption forms, full prospectus, Key Investor Information Documents (KIID), General Commercial Terms, Annual Reports and Monthly Reports from our local websites or branch office. Statements reflect the portfolio managers' viewpoint at a given time, and this viewpoint may be changed without notice. This report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN AS does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of this report. Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

Effective 1/1/2014, the Fund's investment mandate changed from investing a minimum of 50% of its funds in Norway to investing a minimum of 50% of its funds in the Nordic countries. This means that returns prior to the change were achieved under different circumstances than they are today. Prior to 1/1/2014, the benchmark index was an evenly composed benchmark index consisting of the Oslo Stock Exchange Benchmark Index (OSEBX) and the MSCI All Country World. The benchmark index prior to 1/1/2010 was the Oslo Stock Exchange Benchmark Index (OSEBX).
